## GXNB

### ISOLATING MODUL WITH AUXILIARY POWER SUPPLY

#### Improved lightning resistant design

- Isolation and mutual conversion of 0..20mA, 4..20mA, 0..10V signals
- 18 V DC power supply to power the two-wire converter via input line
- input-to-output-to-power supply isolation: 4000Vr.m.s.
- auxiliary power supply in wide range 19 to 300VDC and 90 to 250VAC
- DIN 35 rail-mounted design
- conversion accuracy: < 0.1%
- time response standard 1ms

The module is designed to isolate and convert standard current or voltage ranges, namely 0..20mA, 4..20mA and 0..10V. The module also provides a 18V/20mA power supply for powering the input current loop 4-20mA. Typical, the module can be used as a supply for power and isolation for converter powered by current loop. The output of the converter is isolated from the input and the auxiliary power supply.

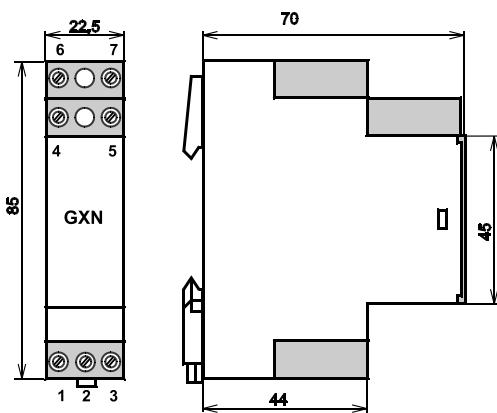

**The more resistant design in lightning protection. The module provides additional protection lightning arresters and wire resistors in inputs. Suitable for outdoor use.**
